Taejoon Han

Master's Student, Department of Computer Science and Engineering
Ulsan National Institute of Science and Technology (UNIST)
Email: taejoon.han@unist.ac.kr

RESEARCH INTERESTS

Graph mining and data management, with a focus on cohesive subgraph discovery, community search, and network stability analysis on large-scale and complex networks.

EDUCATION

Ulsan National Institute of Science and Technology (UNIST) Sep 2025 – Present
M.S. in Computer Science and Engineering
Advisor: Prof. Junghoon Kim

Ulsan National Institute of Science and Technology (UNIST) Mar 2020 – Aug 2025
B.S. in Computer Science and Engineering

AWARDS & HONORS

- **Research Subsidies for Master's Students, NRF** 2026 Fall – 2027 Summer
- **ACM SIGMOD 2026 Travel Grant Awardee** 2026
- **ACM CIKM 2025 Student Travel Grant**. 2025
- **National Scholarship for Graduate Studies**, Ministry of Education, South Korea. 2025 Fall – Present
- **Best Paper Award (Bronze)**, Korea Database Conference (KDBC) 2024. 2024

PATENTS

- "Method and Apparatus for Discovering Cohesive Subhypergraphs Using Decay-based Participation Strength in Hypergraphs." Application No. 10-2026-0096258, May 2026.
- "Network Clustering System and Method Based on Weighted Structural Similarity." Application No. 10-2026-0004498, Jan 2026.
- "Community Detection Method for Large-scale Attributed Networks via Joint Structural and Attribute Modularity Maximization." Application No. 10-2025-0205480, Dec 2025.
- "Method and Apparatus for Discovering Cohesive Subgraphs in Bipartite Networks." Application No. 10-2025-0166255, Dec 2025.
- "Method and Apparatus for Community Detection Based on Ollivier-Ricci Curvature and Modularity." Application No. 10-2025-0034070, Mar 2025.

TEACHING EXPERIENCE

Teaching Assistant, CSE321 Database Systems Spring 2026
Department of Computer Science and Engineering, UNIST
Teaching Assistant, NOVA503 AI Toolkit for Industry Spring 2026
Department of Computer Science and Engineering, UNIST
Teaching Assistant, CSE221 Data Structures Fall 2025
Department of Computer Science and Engineering, UNIST
Lecturer/TA, LG Electronics DX & Living DX Intensive Course Jun 2024 – Feb 2026
Conducted multiple industry training programs for LG Electronics employees, covering Python, data mining, machine learning, and applied LLM topics. Selected sessions:

- *Data Mining & Machine Learning* (Jun 2024, Jul 2025): Lectured on Apriori, Decision Trees, Random Forests, k-Means, and DBSCAN with hands-on Python/Google Colab labs.
- *PBL — Personalized Washing Machine Course Recommendation* (Feb 2025): Mentored a project applying multi-output Random Forests and clustering for personalization based on user-level usage data.
- *PBL — Factory Power Consumption Forecasting* (Aug – Sep 2025): Guided data preprocessing, Ridge regression with lag/rolling-mean features, and built a RAG-based chatbot using OpenAI API, ChromaDB, and Streamlit.
- *Prompt Engineering with Open-source LLMs* (Jan 2026): Deployed `gpt-oss-20b` on a lab server with a custom web API and led prompt-engineering workshops covering parameter tuning, sentiment analysis, and translation.
- *BOM Price-change Automation with LLMs* (Feb 2026): Developed a tree-based BOM-comparison pipeline and an LLM-based PowerPoint specification reader for automated extraction of part-cost change reasons.

Lecturer/TA, Nuclear Power & Energy Specialized AI Professional Training Program May 2026
Conducted a hands-on session covering the full pipeline from data preprocessing with pandas to the implementation of Decision Trees, k-Means, and DBSCAN.
Lecturer/TA, Research Paper Writing — UNIST Novatus Graduate School July 2026

SERVICE & ACTIVITIES

- **CSE Supporters**, UNIST. Mar 2024 – Jun 2025
- **Student Council Member**, UNIST. Sep 2020 – Jun 2022
